Potential Asian Giant Hornet Specimen/Photograph Submission Form

IMPORTANT: Should you believe you have observed an Asian giant hornet (*Vespa mandarinia*), please do not attempt to collect a live specimen. Rather, please attempt to capture photographs and/or videos and submit them by following the instructions found at the following link https://askanentomologist.tamu.edu/insect-id-form/.

Should you find a dead specimen, please place in a leak-proof container with enough isopropyl alcohol to submerge the specimen(s). Place the container inside a sealable bag along with a few paper towels to collect any alcohol that may leak during shipping. Place all materials and this completed form inside a suitable shipping box and send to the address below.

Name:	Locality: (City)
Business:	(County)
Address:	Date Collected:
City:	Collector:
State: zip:	Collection notes (describe site, location):
Date:
